Futures

Your letter to Nossal could not have been more discreet. I hope you have a fruitful interview with him.

-----

Your question to him reminded me of ~~an~~ a group ("LASITOC") that I encountered in Stockholm two years ago, at a Symposium of the Nobel Foundation on "The Place of Value in a World of Facts". Fjellander or Harper may have established correspondence with some groups in Australia.

Also, try Boris Pregel, World Academy of Arts and Sciences, 630 5th Ave., Suite 627, NYC 10020.
